

UCDP defines state based armed conflict as: “a contested incompatibility that concerns government and/or territory where the use of armed force between two parties, of which at least one is the government of a state, results in at least 25 battle related deaths in a calendar year.

Variable Name	Content	Type
Side A	The name of the country on Side A, always the government side in intrastate conflict.	string
Conflict ID	The unique identifier of the conflict	integer
Side B	The opposition actor or country in Side B. In intrastate conflict, this includes a military opposition organization	string
Incompatibility	The main conflict issue identified per the UCDP integer definitions <ol style="list-style-type: none"> 1. Incompatibility about territory 2. Incompatibility about government 3. incompatibility about government AND territory 	integer
Year Observed	The year of observation of the conflict	object
Intensity Level	The intensity level in the conflict per calendar year. The intensity is coded between two levels: <ol style="list-style-type: none"> 1. Minor: between 25 and 999 battle related deaths 2. War: at least 1,000 battle related deaths 	integer

Type of Conflict	<p>One of the following four types of conflict:</p> <ol style="list-style-type: none"> 1. Extrasystemic (between a state and a non-state group outside its own territory, where the government side is fighting to retain control of a territory outside the state system) 2. Interstate (both sides are states in the Gleditsch and Ward membership system) 3. Intrastate (Side A is always a government, side B is always one or more rebel groups; there is no involvement of foreign governments with troops) 4. Internationalized intrastate (side A is always a government, side B is always one or more rebel groups, there is involvement of foreign governments with troops). 	integer
Start Date	The date, as precise as possible, of the first battle related death in the conflict. The date is set after the conflict fulfills all criteria required in the definition of an armed conflict, except for the number of deaths	Datetime object

Ended	A dummy variable coding whether or not the conflict is inactive the following year, and thus has ended. If it has ended, the variable is coded as 1, if it is ongoing, it is a 0.	integer
End Date	The date, as precise as possible, of when the conflict activity ended	Datetime object
GDP	World Bank GDP of the year of observation of Side A	integer
Population	World Bank Population of the year of observation of Side A	integer
Military Expenditure % of GDP	World Bank military expenditures as a percentage of GDP of the year of observation of Side A	integer
Gini Index	Gini Index of the year of observation of Side A	integer
Adult Literacy Rate	World Bank Adult Literacy Rate of the year of observation of Side A	integer
Crude Death Rate	World Bank CDR of the year of observation of Side A	integer
Child Mortality Rate	World Bank Child Mortality Rate (under 6 years) of the year of observation of Side A	integer
Life Expectancy	World Bank Life expectancy of people in the year of observation in Side A	integer

Refugees from Origin	The number of refugees who fled Side A in the year of observation	integer
